Teacher Panel (Web and App) — Complete Specification

Oct 13, 2026 · @Nagendra

Overview

The teacher panel is where teachers do their daily school work — attendance, homework, marks, remarks, messages to parents and their own leave — on the phone app during the day and on the web when they need a bigger screen for marks and planning.

Web or app

Task	App	Web
Today's periods, substitutions	✓ (main use)	✓
Mark class attendance (works offline)	✓ (main use)	✓
Post homework, check submissions	✓	✓
Marks entry	✓ (one subject, one section)	✓ (main use: full grid, Excel import)
Report card remarks (class teacher)	✓	✓ (main use)
Lesson plans and syllabus progress	✓ (mark topic done)	✓ (main use)
Messages with parents	✓ (main use)	✓
My leave, attendance, payslip, profile	✓	✓

What a teacher sees

- **Scope comes from allocation:** a subject teacher sees only the class-sections and subjects allocated to them; a class teacher also sees their whole section (all students, attendance, guardians' contact through in-app chat, remarks). Nothing is set by hand.

- **Never shown:** fee amounts and dues of individual students, other teachers' salaries, staff personal data, admissions pipeline, accounts.
- **Guardian contact:** teachers message parents inside the app; parents' phone numbers are not shown to teachers (the school can change this setting).
- **Substitutions:** while substituting, the teacher gets that period's class list and attendance for that period only.

Layout

Web	App
Teacher sidebar: Today · My timetable · My class · Attendance · Homework & syllabus · Marks & remarks · Messages · Leave & payslip · My profile	Bottom tabs: Today · Attendance · Classes · Messages · Me
Top bar: search within my students, session, notifications, profile switch (if also a parent)	Header with screen title and notifications; offline badge when there is no internet

Sample used in all designs: Sunita Rathore, TGT Science, class teacher of 8-B, teaches Science in 7-A, 7-B, 8-A and 8-B.

Today and timetable

Today (web dashboard and app home)

Section	Contents	Actions
Greeting	Date, name, school	—
Class teacher card	"Mark today's attendance · 8-B · due by 10:00 am · 38 students"; turns green once submitted with the count present	Mark attendance
My periods today	Time, class, subject, topic or note; tags Done / Next / Later / Substitute (amber)	Open period: attendance for that period, topic done, homework
To do	Marks entry deadlines, homework to check, remarks pending, unread parent messages	Each opens its screen

Section	Contents	Actions
Quick actions	Post homework · Enter marks · Messages	—

Substitutions

When the admin assigns a substitute period, the teacher gets a push and SMS; the period shows on Today with the absent teacher's name and the class's plan ("Ch. 6 revision, worksheet in resources"); after the period the teacher marks it done with a short note. Monthly substitution count shows on the profile.

My timetable

Week view (Mon–Sat × periods) with subject tints and room; today's column highlighted; substitutions in amber; total periods per week vs maximum; tap a period for class list, last homework and topic.

Attendance and my class

Mark attendance

1. Choose the class (the class-teacher section is pre-selected; period-wise schools also list today's periods).
2. Everyone starts as Present; tap a student to set Absent, Leave, Half day or Late; approved leave from parents is already filled and locked.
3. Search by name or roll number; *Mark all present* resets.
4. Summary bar shows present, absent, leave and today's %.
5. Submit → parents of absent and late students get a notification within 5 minutes; the screen shows "Submitted at 8:52 am".
6. Changes after submit are allowed the same day (logged); later changes need the admin.
7. Offline: the list is saved on the phone with an "Offline — will send when online" badge and synced automatically.

My class (class teacher)

Tab	Contents
Students	Roll, name, photo, attendance % (amber below 75%), homework completion, latest result; tap for a student card (no fee amounts)
Attendance	Month calendar for the section, chronic absentees, leave requests from parents to approve
Remarks	Term remarks per student with a remark bank; co-scholastic grades
Parents	Chat with any guardian of the section; PTM slots and notes

Student card shows: photo, class, roll, guardians' names (message button), attendance this term, homework completion, subject-wise latest marks, teacher notes (private to teachers), health alerts the school chose to share (for example allergy).

Leave requests from parents

Parents apply for a child's leave in their app; the class teacher sees requests on Today and in My class › Attendance with dates, reason and attachment, and approves or rejects with an optional note. Approved days fill attendance as Leave automatically; a rejected request tells the parent why.

Homework, syllabus, marks and remarks

Homework

- **Post:** class (one or several sections of the same subject), subject, topic from the syllabus, what to do, due date, submission type (notebook only, or photo/file in the app), attachments (PDF or image, up to 10 MB), *Post now* or *Schedule*.
- **Check:** list of students with Submitted / Not submitted; open a submission, mark Checked, Incomplete or Redo with a short comment; *Remind not submitted* sends one push to those parents.
- **Daily diary:** all homework of a class is sent to parents together at the school's diary time (default 4 pm); posts after that time go the next day unless *Send now* is chosen.

Syllabus and lesson plans

Units and topics per subject and class; mark a topic Done with the date (from Today or here); planned vs done progress bar with a target marker (amber when behind); lesson plan per topic (objective, method, resources, planned date) that the principal can comment on.

Marks entry

1. Choose exam, class-section and subject (only the teacher's own allocations appear).
2. Grid of students × components with maximum marks shown in the header; type a number, or AB (absent), ML (medical), EX (exempt).
3. Values above the maximum or invalid codes turn amber and block submission; the total and grade calculate as you type.
4. Autosave every few seconds; *Import from Excel* on the web.
5. *Submit for verification* before the deadline; the exam coordinator verifies and makes it Final.
6. After Final, a change needs *Request unlock* with a reason; the principal or coordinator approves; the change is audited.

In the app the same grid becomes one student per row with a number pad, and a progress counter ("31 of 38 entered").

Remarks and co-scholastic grades (class teacher)

Per student per term: a remark (chosen from a remark bank by performance band and edited), co-scholastic grades (A/B/C), attendance filled automatically. Progress counter and *Submit remarks*; report cards can be generated only after all remarks are submitted.

Messages, notices and PTM

- **Chat with parents:** one thread per student's guardians; teacher can start a chat from the student card; photos and PDFs allowed; *Office hours only* setting stops parents' messages outside 8 am – 6 pm (shown to parents); every thread is visible to the principal; inappropriate messages can be reported.
- **Class notices:** class teachers can send a short notice to their own section's parents (for example "Bring science model tomorrow"); school-wide notices stay with the office.
- **PTM:** the teacher's slot list for the day (booked, free, met, no-show), parent and child names, quick notes during the meeting; notes visible to the class teacher and principal.

My leave, attendance, payslip and profile

- **Apply for leave:** type (CL, SL, EL…), dates or half day, reason, attachment for sick leave; balance shown before submitting; status Pending, Approved, Rejected; cancel before it starts. Approved leave opens the teacher's periods for substitution.
- **My attendance:** month calendar of punches (present, late, leave), late count against the school's rule.
- **Payslips:** list by month with net pay; open a payslip (earnings, deductions, net) and download the PDF; Form 16 when issued.
- **My profile:** read-only view of personal details, qualifications, documents with expiry, teaching allocation and CPD hours; *Request a correction* sends changes to HR.
- **Settings:** language, notification choices, office-hours for chat, app PIN and fingerprint, devices signed in, sign out.
- **Notifications:** substitutions, leave decisions, marks deadlines, parent messages, school notices, payslip ready.

Rules

Area	Rule
Offline	Attendance, homework drafts and marks entry work without internet; items wait in a queue with an "Offline" badge and sync automatically; conflicts (someone else changed the same record) are shown to the teacher, never silently overwritten; items older than 72 hours need the teacher to confirm
Deadlines	Attendance cut-off from school settings (default 10:00 am); marks deadline per exam; remarks deadline before report card generation; reminders at 24 hours and 2 hours before
Locks	Attendance editable by the teacher the same day only; marks locked after Final (unlock request); remarks locked after report cards are published
Privacy	No fee amounts, no parent phone numbers (by default), no other teachers' data; screenshots of student lists carry no watermark but exports are not available to teachers

Area	Rule
Messaging	Only with guardians of their own students; office-hours setting respected; all threads visible to the principal; no student-to-teacher private chat for minors
Audit	Attendance edits, marks changes, unlock requests and remarks edits are recorded with time and reason
Language	Every screen in English and Hindi; remark bank in both languages
Devices	App works on Android 8+ phones with 2 GB RAM; web on a 1280 px laptop

Screen index and acceptance checklist

The teacher panel has 10 web screens and 16 app screens; Teacher Home (app) and the app sign-in screens were designed earlier; everything else is new.

Area	Web	App
Today	Today dashboard (new)	Teacher Home (earlier)
Timetable	My timetable (new)	My timetable (new)
Attendance	Mark attendance (new)	Mark attendance · Submitted · Offline (new)
My class	My class with students, attendance, leave requests (new)	Class list · Student card (new)
Homework and syllabus	Post and check homework, syllabus progress (new)	Post homework · Check submissions (new)
Marks and remarks	Marks entry grid (new) · Remarks (new)	Marks entry (new)
Messages	Messages with parents (new)	Chats · Chat thread (new)
My leave and pay	Leave, my attendance and payslips (new)	Apply leave · Payslip (new)
Profile and settings	My profile — read-only with Request a correction (new)	Me and settings (new)

Area	Web	App
Notifications	Bell in the top bar	Notifications (new)
Sign-in	Login screens (earlier)	App sign-in screens (earlier)

Acceptance checklist

- [ ] A teacher sees only allocated classes; a class teacher also sees the whole section
- [ ] No fee amounts or parent phone numbers appear anywhere for teachers
- [ ] Attendance for 40 students can be marked in under 30 seconds on a low-end phone, also offline
- [ ] Parents of absent students are notified within 5 minutes of submit
- [ ] Marks above the maximum cannot be submitted; Final marks need an approved unlock
- [ ] Report cards cannot be generated until the class teacher submits all remarks
- [ ] Homework posted after the diary time goes out the next day unless sent now
- [ ] Leave approved by the office opens the teacher's periods for substitution
- [ ] Every screen works in English and Hindi
