School Admin Panel — Complete Specification

Oct 13, 2026 · @Nagendra

Overview

The admin panel is the web application the school office runs on: the owner, principal, admin, accountant, HR, front office and other office staff use it on a computer, and each person sees only the menus and data their role allows.

Layout of every screen

Area	Contents
Sidebar (232 px, dark teal)	School logo, name and campus; menu (below); version and help link at the bottom
Top bar (64 px)	Global search (student, admission number, parent mobile), session switcher, notifications bell, user menu (My account, Switch school, Sign out)
Banners (when needed)	Trial banner, overdue/read-only banner, platform announcement, support session notice
Page header	Breadcrumb, page title, one-line description, main actions on the right
Content	Cards and tables, max width 1200 px; tabs for related screens inside a module

Menu

Dashboard · Approvals · Admissions · Students · Attendance · Academics & Timetable · Examinations · Fees · Accounts · Staff & Leave · Payroll · Transport · Hostel · Library · Inventory & Assets · Front Office · Communication · Reports · Settings · Users & Audit · Plan & billing · Help & support

Menus a person has no permission for are hidden, not greyed out. Modules not in the school's plan show a small "Upgrade" tag and open a plan comparison instead of the module.

Rules common to every screen

- **Session-aware:** every list and form works on the current academic session; switching to a closed session makes the whole panel read-only with a grey banner.
- **Branch-aware:** branch admins see only their branch; group-level users get a branch filter on every list.
- **Search, filter, export:** every list has search, filters as chips, pagination (50 rows), and export to Excel (watermarked, audited).
- **Save and errors:** forms validate on the field, keep typed data on error, and show one banner explaining what to fix; long forms autosave drafts.
- **Approvals:** anything that needs a second person (concession above limit, receipt cancellation, refund, marks unlock, TC, payroll, deletion) goes to the Approvals inbox instead of applying at once.
- **Audit:** every create, edit, delete, export and approval is recorded with user, time, old and new value.
- **Language:** every screen in English and Hindi; numbers in Indian format (₹1,23,450), dates as 9 Oct 2026.
- **Empty states:** every list explains what will appear there and offers the first action (for example "No students yet — Import from Excel or Add student").

Home

Dashboard

The principal's and admin's first screen: what needs attention today and how the school is doing.

Section	Contents	Actions
Header	Greeting, date, session	New admission, Collect fee
KPI tiles	Active students, today's attendance %, collected this month vs due, outstanding dues and defaulters	Each tile opens its report
Attendance not marked	Sections without attendance after the cut-off, with class teacher	Send reminder
Fee collection, last 7 working days	Bar chart, today highlighted	Full report

Section	Contents	Actions
Waiting for your approval	Latest 4 items from Approvals	Review → Approvals
Today	Cut-offs, PTMs, events, diary time	—

Tiles and lists show only what the person's role allows (an accountant sees fee tiles, not academic ones).

Approvals inbox

One place for everything waiting on a second person.

Section	Contents
Type filter	All · Concessions · Receipt cancellation · Refund · Marks unlock · Transfer certificate · Staff leave · Notices · Payroll · Fee structure
List	Type, what, requested by and when, amount or impact, age; overdue items (over 2 days) in amber
Detail panel	Full request, reason, attachments, history, impact (for example "6 periods need substitutes")
Actions	Approve, Reject (reason required), Ask for change; bulk approve for same-type low-risk items (leave, notices)

Rules: a person cannot approve their own request; approval limits come from Roles (for example concessions above ₹5,000 need the principal).

Trial getting-started (during trial only)

Trial banner, 6-step checklist with progress, sample-data switch, help card (import help, setup call, WhatsApp). Disappears once the school pays; the checklist stays available under Help.

Setup and admissions

Setup wizard

Nine steps with saved progress: school profile · branches · academic session · classes and sections (seats, RTE seats) · subjects · timings and holidays · number series · grading scheme · staff and roles. *Copy from last session* on each step. After setup it stays available

under Settings.

Admission CRM (pipeline)

Section	Contents	Actions
Header	Intake session	Copy application form link, Add enquiry
Filters	Class, source, counsellor; overdue follow-ups count	—
Board	Columns Enquiry → Follow-up → Application → Documents verified → Test/interaction → Approved → Enrolled, with counts; cards show child, class, parent, source, next step	Drag to move stage; open card
Seats left	Per class, filled vs capacity	—

Application review

Stage strip; application details (child, parents, address, previous school, sibling, transport); age check result; documents with status (Verified / Pending) and *Request re-upload*; interaction slot and outcome; seats left including RTE; follow-up log. Actions: Send for principal approval, Mark as lost (reason).

Add student

Section menu with completion marks: Student · Guardians (sibling detection by mobile, link existing guardians) · Address · Class, fee category and transport · Documents · Parent consent (required data consent; optional photos and WhatsApp). Actions: Save as draft, Save and collect admission fee. Admission number generated on save.

Import students from Excel

1. **Download template** (students, guardians; columns explained in Hindi and English).
2. **Upload** the filled file.
3. **Match columns** if the file's headings differ.
4. **Dry run:** rows OK, rows with errors (per row and column: missing DOB, invalid mobile, duplicate admission number, unknown class), possible duplicates of existing students. Nothing is saved yet.

5. **Fix:** download error file, correct, upload again — or skip the bad rows.
6. **Import:** creates students, guardians (with sibling links), enrolments and fee plans in one batch; shows a summary and keeps a batch ID that can be undone within 24 hours.

Students

Student list

Header with active count; actions Import from Excel, Print ID cards, Add student; tabs to Promotion and Certificates. Filter chips: status, class, section, category, fee dues only, RTE, transport users. Table: photo/initials, name, gender and DOB, admission number, class, guardian and mobile, attendance % (amber below 75%), fee due (amber), tags (Sibling, RTE, Bus, CWSN, Staff ward). Bulk select for SMS, ID cards, export.

Student profile

Section	Contents
Header	Photo, name (English and Hindi), class, roll, admission number, house; status and tags; Message guardian, Issue certificate, Edit
Tabs	Overview · Guardians · Attendance · Fees · Exams · Documents · History
Overview	Personal and government IDs (Aadhaar masked), guardians with primary contact and pickup permission, fee summary for the session, attendance calendar strip, recent changes
Fees tab	Ledger with demands, receipts, concessions, fines and balance; Collect fee
Exams tab	Term results, report cards (PDF)
Documents tab	Uploaded documents with verification status
History tab	Every field change with old and new value, who and when; class and session history

Year-end promotion

Class selector, section rule for the new class (keep, balance by gender, alphabetical), summary tiles (promote, detain, leaving), table with annual result, attendance and Promote / Detain / Leave choice per student; Confirm decisions. Reversible per student until the new session's first attendance.

Certificates

Tabs: Transfer certificate · Bonafide · Character · Fee paid · Date of birth · Issued register. TC: clearance checks (fees, library, transport, exam records), fields (date of leaving, reason, conduct), live preview in the board's format with QR, Approve and issue (principal), gap-free TC numbers.

Attendance and academics

Daily attendance

Class and date selectors, summary tiles (present, absent, leave, half day, today's %), everyone Present by default, P/A/L/HD/LT per student, notes on absent rows, Mark all present, Submit. Parents of absent and late students are notified within 5 minutes. Edits after submit need permission and a reason.

Timetable

Class / Teacher / Room views; grid of days × periods with lunch; subject colour tints; clashes outlined in amber and listed with *Show free slots*; weekly load check per subject; today's substitutions with suggested free teachers; Publish timetable (blocked while clashes exist); versions with effective date.

Homework and syllabus

Post homework (class, subject, topic, what to do, due date, submission type, attachment); recent homework with checked/submitted progress; syllabus completed vs planned per subject with a target marker (amber when behind). Daily diary to parents at 4 pm.

Examinations

Exam setup and date sheet

Exam name, term and scheme version; assessment components for the term (max marks, rule); date sheet table (date, time, papers per class, invigilators) with missing invigilators flagged; Print admit cards, Seating plan, Publish date sheet.

Marks entry

Subject and section header with teacher and autosave time; stepper Draft → Submitted → Verified → Final; error banner (for example a mark above maximum); grid with one input per component, total and grade calculated live; allowed values (number, AB, ML, EX); Import from Excel; Submit for verification (disabled while errors exist). After Final, changes need an unlock request through Approvals.

Results and report cards

Option to withhold report cards for dues over a set number of days; table per section: subjects final (x/7), remarks complete, pass %, report card status (Not ready, Generated, Published) with Generate / Publish / View; withheld list with dues; subjects with lowest pass %.

Fees and accounts

Fee counter

Student card (class, admission number, guardian, concession); dues by installment with heads and overdue marks, oldest selected first; payment panel (Cash, UPI QR, Cheque, Card, Bank), selected dues, late fee with rule, total; dynamic UPI QR when UPI is chosen; Collect and print receipt (gap-free number). Links: fee structure, defaulters, online payments, day-end closing.

Fee structure

Tabs Counter · Fee structure · Defaulters · Online payments · Accounts. Draft structure per session: fee heads × class groups with amounts, frequency and notes, annual totals; fee-hike warning above the school's limit; installment plan and late fee rule; concession rules (sibling, staff ward, RTE, merit). Send for approval.

Defaulters

Buckets 15–30, 31–60, over 60 days with amounts; table with student, guardian and mobile, overdue amount, days late, last reminder, notes (promises); select rows → Send WhatsApp reminder with pay link or SMS; Export with contacts.

Online payment reconciliation

Paid orders, settled amount after gateway charges, matched count, exceptions; exceptions table (paid without webhook, double payment, missing from settlement, amount mismatch) with suggested action; explanation of how a payment is confirmed.

Day-end cash closing

Denomination counter (₹500 to ₹5) with totals, system cash receipts, opening float, counted cash, difference (Matches / Short / Excess), UPI/card/cheque total, note, Submit for supervisor sign-off. The counter cannot open next day until signed off.

Accounts day book

Tabs Day book · Cash book · Bank book · Ledgers · Trial balance; balances (cash, bank, fee income, expenses); voucher table (receipt, payment, journal, contra) with ledger, narration, source (fee counter, online, payroll, manual), debit and credit, balanced totals; New expense voucher (bill upload, approval); Export to Tally (XML).

Staff and HR

Staff directory

Tabs Directory · Leave · Staff attendance · Payroll; counts by type; document-expiry banner; cards with name (opens profile), role, department, code and joining date, status (Present, On leave, Probation) and one key fact; Add employee.

Teacher / employee profile

Header with status and class-teacher badge; tabs Overview · Personal & IDs · Qualifications & documents · Teaching · Attendance & leave · Salary · Training & appraisal · Login & roles (contents as in the teacher profile specification). Non-teaching staff see the same profile without the Teaching tab.

Staff attendance

Shift rule; tiles (present, on leave, not punched, late this month); monthly register (staff × days) with P, LT, A, CL/SL and Sundays; late count with amber at 3+; Import device punches, Print register.

Leave approvals

Request cards with type, dates, days, reason, balance after, impact (substitutes, bus driver cover, invigilation clash); Approve or Reject; leave types and yearly quota.

Payroll run

Stepper Lock attendance → Calculate → Review exceptions → Principal approval → Bank file & payslips; totals (employees, gross, deductions, net); exceptions list; employee table with payable days, gross, PF, ESI, TDS, other deductions, net; Send for principal approval.

Operations and communication

Screen	Sections	Key actions and rules
Transport	Route list with load bars (amber above 95%); selected route stops with times and students; live map (GPS add-on); vehicle and staff compliance with expiry dates (amber within 30 days)	Assign students, Add route; transport fee posts to the student ledger
Hostel	Floor selector; tiles (beds, occupied, night roll call, mess fee due); room cards with beds (occupied, vacant, out on pass); outpass requests	Allocate bed; outpass needs parent approval in the app
Library	Issue / Return tabs; scan member, scan book, due date; overdue list with fines	Issue book, Remind all guardians; fines post to the fee ledger on return
Inventory and assets	Low-stock banner; stock table (in stock vs reorder level, value, last movement); assets due for maintenance	Issue items, New purchase request; purchases post vouchers to accounts

Screen	Sections	Key actions and rules
Front office — visitors	Visitor entry form (OTP, purpose, person to meet, photo) or early pickup (only authorised guardians); visitors inside campus with time	Check in and print gate pass, Check out
Complaints and discipline	Status chips; tickets with category, raised by, assigned to, response due (72 hours, amber when late), status; restricted incident register; separate child-protection workflow	Log complaint; overdue tickets escalate to the principal
Notices	Title, message, Hindi version, audience chips with reach count, channels (app, WhatsApp, SMS fallback) with credits, acknowledgement option; preview; recent notices with read %	Send for principal approval or Schedule
Parent-teacher meeting	Event header; tiles (slots, booked, met, no-shows); slot grid per teacher (booked, met, no-show, free); latest notes	New PTM, Remind unbooked parents
Reports and KPIs	Chosen report with chart (for example fee collection efficiency by class with target line); report library by area (students, attendance, fees, exams, HR)	Export Excel, schedule email (for example daily at 6 pm)

Settings, people, billing and help

School settings

Tab	Contents
School profile	Name, logo, address, UDISE code, affiliation number, board, medium, principal's signature for certificates
Academic	Sessions (current, next, closed), classes, sections, subjects, timings, holidays — opens the setup wizard steps

Tab	Contents
Fees and payments	School's own payment gateway account for parent payments (keys masked), receipt format, late-fee rules, concession limits
Numbering	Admission, receipt, TC and employee number formats and next numbers
Communication	SMS sender name, WhatsApp opt-in text, daily diary time, attendance alert timing, quiet hours
Attendance and timetable	Attendance mode (daily, twice, period-wise), cut-off time, late rule, staff shift and grace
Branding	Logo and colours on receipts, report cards and ID cards; print templates
Data and privacy	Consent notice text and version, data export, retention notes, grievance contact

Users, roles and audit

Users (staff logins with roles, scope, two-step status, last active; invite, unlock, disable); Roles & permissions (role list, permission matrix by module × action, approval limits, clone role); Audit log (time, action, what, details, who; filters; watermarked export).

My account

Profile (name, photo, mobile, email, language), password change, two-step setup (SMS or authenticator, backup codes, trusted devices), active sessions with *Sign out of all other devices*, notification preferences (which alerts by app, email, SMS).

Notifications

Bell with unread count opens a panel: approvals waiting, attendance not marked, payments received, failed messages, platform announcements, support access requests; filter All / Unread; *Mark all read*; each item opens the related screen.

Plan and billing (school side)

Section	Contents
Current plan	Plan, status (Trial / Active / Overdue), renewal or trial end, billable students, add-ons

Section	Contents
Choose or change plan	Three plans side by side with modules; yearly estimate (price × students + add-ons + GST); Pay online or Get pro-forma for bank transfer
Invoices and payments	Invoice list with status and PDF; payments with method and reference
Message credits	SMS and WhatsApp balance, usage this month, Buy credits
Billing details	Billing name, GSTIN, address, billing contact email

Help and support

- **Help centre:** search, short guides by module, getting-started checklist, WhatsApp chat.
- **My tickets:** list with status (Open, Waiting on you, Resolved) and reply thread; *Raise a ticket* form (subject, module, details, screenshot, priority).
- **Support access requests:** pending requests from the platform support team with who, reason, area and duration — *Approve* or *Reject*; active grants with time left and *Revoke now*; history. During an active grant every admin sees a notice bar.

Screen index and acceptance checklist

The admin panel has 47 screens: 39 designed earlier and 8 new ones that complete it.

Area	Screens	Status
Home	Dashboard · Trial getting-started	Designed earlier
Home	Approvals inbox	New
Setup and admissions	Setup wizard · Admission CRM · Application review · Add student	Designed earlier
Setup and admissions	Import students from Excel	New
Students	Student list · Student profile · Year-end promotion · Certificates	Designed earlier
Attendance and academics	Daily attendance · Timetable · Homework and syllabus	Designed earlier

Area	Screens	Status
Examinations	Exam setup · Marks entry · Results and report cards	Designed earlier
Fees and accounts	Fee counter · Fee structure · Defaulters · Online payments · Day-end cash closing · Accounts day book	Designed earlier
Staff and HR	Staff directory · Teacher profile · Staff attendance · Leave · Payroll	Designed earlier
Operations	Transport · Hostel · Library · Inventory · Visitors · Complaints	Designed earlier
Communication and reports	Notices · PTM · Reports	Designed earlier
People	Users · Roles and permissions · Audit log	Designed earlier
Settings and account	School settings · My account · Notifications panel	New
Plan and help	Plan and billing · Help and tickets · Support access requests	New
Sign-in	Login and all sign-in screens	Designed (Registration and Login package)

Acceptance checklist

- [ ] Every menu item opens a real screen; menus without permission are hidden
- [ ] Every list has search, filters, pagination and an audited export
- [ ] Switching to a closed session makes all screens read-only
- [ ] Nothing that needs a second person is applied without passing through Approvals
- [ ] A person cannot approve their own request
- [ ] Excel import never saves anything before a clean dry run; a batch can be undone within 24 hours
- [ ] Plan and billing shows the same prices as the platform's plans
- [ ] Support access requests show who, why, what area and how long, and can be revoked at any time
- [ ] Every screen works in English and Hindi and on a 1280 px laptop screen

- [ ] Every create, edit, delete, export and approval appears in the audit log
